HIGH CAPACITY LI-PO

The battery inside the V4pro rechargeable is a high capacity low weight Li-Po cell with 2800 mAh of capacity. The large battery capacity is essential as the battery is charged inside the headlamp, and therefore needs to be able to power the light for a long time before having to be recharged.

ELECTRONIC SWITCH + DIMMING

With our Intelligent Light Control and electronic dimming you can get just the right light output you need for a given situation. Dim the light stepless from 425 to 6 lumens simply by holding a button.

SOFT FOAM PAD

The soft foam pad on the back of the lamp head gives you extra comfort on the forehead. You no longer have to worry about a sore forehead, when wearing the headlamp for longer periods of time.

OPTICAL MIXED BEAM

The optical mixed beam is optimized for fast moving sports and biking. The mixed beam with 10/30-degree spotlight gives you a visual advantage in the early and late hours of the day.

VERSATILE PLUG SYSTEM

Our professional headlamps are fitted with plugs and exchangeable cables, to let you carry your battery pack in a belt, or to put it in your bag, leaving you with under 80 grams of weight on your head.

DC CONVERTER TECHNOLOGY

The V4pro rechargeable is fitted with our new and highly efficient electronic circuitry. It reduces the heat development of the Power LED and decreases the energy consumption. The advantage is 30-40% longer runtimes and highest constant light output.
